SUMMARY

Full-Stack Software Engineer focused on building thoughtful, reliable tools for creative and developer workflows. I work across frontend, backend, and AI integrations, with experience turning complex product ideas into polished, maintainable systems.

EXPERIENCE

StashBase

Jul 2026 – Present

Open Source Contributor

Remote

- Made 15 contributions to a local-first knowledge base for documents, screenshots, and AI artifacts.
- Improved Markdown rendering and editing with sanitized HTML, accessible footnotes, native heading anchors, alerts, and frontmatter handling.
- Built shared Claude/Codex agent adapters, cross-platform CI fixes, and a WIP live-preview and source-editing workflow for Markdown files.

Samurai Studios

Apr 2026 – Jul 2026

Software Engineer

Remote

- Shipped 57 merged PRs across 4 production codebases for AI-assisted film and advertising workflows.
- Built a story-first creative-brief pipeline for presentation decks with media extraction, visual captioning, structured schemas, provider abstractions, golden evaluations, and an authenticated operator console.
- Delivered multi-scene storyboard workspaces end to end: persistence, REST APIs, version history, backward compatibility, frontend routes, and regression tests.
- Integrated multi-provider image/video generation with continuity prompts, run monitoring, usage logging, and real-time sync; modernized the UI with shared components and Tailwind CSS v4.

fiddle-factory

Dec 2025 – Apr 2026

Software Engineer (Contractor)

Remote

- Shipped 49+ merged PRs across 5 repositories spanning canvas rendering, real-time chat, auth systems, and build infrastructure for an AI component design tool.
- Integrated Storybook across 4 repositories and fixed a canvas hydration race condition affecting first-time users; also implemented PKCE auth and non-blocking chat updates.

fiddle-factory

May 2025 – Aug 2025

Software Engineer Intern

Remote

- Migrated canvas system from react-flow to tldraw—built custom shapes, tools, preview components, and data conversion utilities across 84 files.
- Migrated cloud sandboxes from StackBlitz WebContainers to e2b and built the “make real” AI flow for turning canvas drawings into generated components.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust, Go, C, Python, Shell

Frameworks: React 19, Next.js 15, Node.js, Express.js, Tailwind CSS 4, Remix

Libraries & Tools: shadcn/ui, Radix UI, Framer Motion, Zustand, Storybook, tldraw

Databases: PostgreSQL, MongoDB, Supabase, Firebase

DevOps & Tooling: Git, Docker, GitHub Actions, CI/CD, Linux, Bun, Vercel

Concepts: REST APIs, OAuth/PKCE, WebSockets, Component Architecture, Performance Optimization

PROJECTS

4at | Rust, Go, TCP, Concurrency

2025

- Multi-user TCP chat server built from raw sockets—dual implementation in Rust and Go comparing OS threads vs green threads.
- Token-based authentication, rate limiting, ban system, and broadcast messaging with near-zero dependencies.

mdt | Rust, ratatui, syntect, TUI

2026

- Fast, terminal-based markdown viewer and editor—file tree navigation, rendered preview with syntax highlighting, vim-style editor, and live split-pane preview.
- Published on crates.io as mdtui; dirty-flag rendering, file watching with auto-reload, advisory file locking, and panic-safe terminal teardown.

EDUCATION

National Institute Of Technology Durgapur

B.Tech - Mechanical Engineering

2022 – 2026

Durgapur, West Bengal
